Summary

Focused on cybersecurity innovation, I bring expertise in programming, vulnerability assessment, and information architecture, including risk assessment and incident response. I utilize Excel, Word, and Power BI for effective communication, alongside skills in social engineering, network design, and AI/ML for enhanced security.

Key Achievements

◈ Vulnerability Analysis
Analyzed over 40,000 vulnerabilities, improving system security by 100%.

◈ Firewall Optimization
Reduced firewall recovery downtime to less than 3 minutes.

◈ Governance Implementation
Implemented ~900 controls, passed all assessments successfully.

◈ Academic Excellence
Graduation project ranked 4th in computer science class.

◈ Leadership Commendation
Recognized by president at Kemya; earned 2 appreciation certificates.

Experience

SABIC
COOP Cybersecurity

Sabic Jubail, Eastern Province Saudi Arabia
01/2025 - 07/2025

- Vulnerability management tool to analyze over 40K open and close vulnerabilities.
- Created Policies and controls for Kemya complying with NCA controls, Sabic standards and other international standards such as Nest and ISO.

Education

King Saud University
Bachelor of information system data science path

Riyadh, Saudi Arabia
08/2020 - 08/2025

- Created machine learning projects such as: KSUChatbot, AutoOracle, and Fake news detector.
- Cybersecurity project: a password cracking tool using social engineering and the most 10000 Common passwords.
- While my graduation project scored fourth in the graduation of college of computer science.
